

# Why Use AI for Presentations?

## And why this section matters

1. **Traditional slide creation is slow and manual**
  - a. Every little detail takes time.
  - b. Without design skills, slides can look unpolished.
2. **AI streamlines the process**
  - a. Generates slide content in seconds
  - b. Suggests visuals to enhance storytelling
3. **AI is a creative partner, not a replacement**
  - a. Helps speed up the workflow but requires human refinement
  - b. Best results come from collaboration, not copy-pasting
